

Dial Thickness Calipers

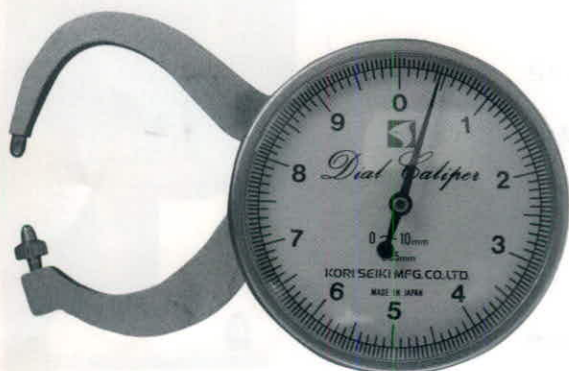

This pocket type dial caliper is very useful for rapid measurements of thickness and making very good use in all fields.

A type: Spherical contact points are ideal for measuring the central thickness of lenses.

G type: Flat contacts are ideal for measuring metal sheets, paper, vinyl and rubber.

P type: Make easy measurement of the wall thickness of Pipes. Measurable minimum inside diameter of pipes is 6mm.

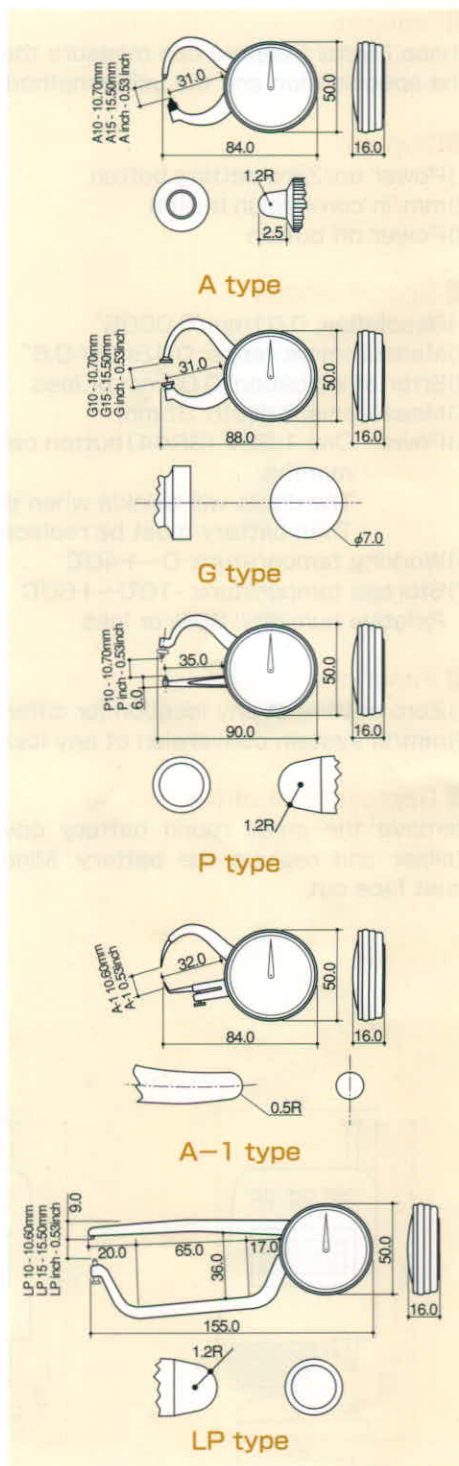

A-1 type: It is suitable for the measurement of a detailed thing.

A type

G type

Type	Minimum measurement unit mm	Measurement range mm		Measurement terminal	Outside diameter of dial mm	Use	note
		0~10	0~15				
A type	0.05	0~10	0~15	Ball ϕ 2.5mm	50	Lens etc.	A
G type	0.05	0~10	0~15	Circle plate type	50	Metal sheets, Paper, Vinyl, Rubber etc.	A
P type	0.05	0~10		Ball ϕ 2.5mm	50	Pipe etc.	A
LP type	0.05	0~10	0~15	Ball ϕ 2.5mm	50	Pipe etc.	C
A-1 type	0.05	0~10		Ball ϕ 1mm	50	Artificial tooth, Ore etc.	B
